PRESS RELEASE

EMT International, Inc. Announces Purchase of Advance Graphics Equipment.

Green Bay, Wisconsin/York, Pennsylvania – September 19, 2011

EMT International, Inc. Green Bay, WI, premier designers and manufacturers of custom and standardized equipment and consumables for conventional and digital web processing, announces it acquired Advance Graphics Equipment of York Inc. (AGE), York, PA, a leading in-line and off-line conventional and digital web finishing systems company on September 2, 2011. The acquisition of AGE will further strengthen EMT's position as a leader in customer-focused product and services in the conventional and digital printing and converting industry.

Advance Graphics Equipment designs and manufactures a wide range of standard and custom conventional and digital web finishing products including sheeters, stackers, batchers, inserters, folders, gluers, perforators, die cutters, three-knife trimmers, and angle bars.

AGE products will be integrated into EMT's current line of conventional and digital web finishing products enabling EMT to further expand its service and products to the converting, paper, document processing, packing, and printing industries worldwide.
